

# Maximizing Farm Profitability Through Smart Innovation

## Our Mission

We help agricultural organizations and their members accelerate innovation adoption, reduce risk, and boost profitability. By integrating AI recommendations, global market intelligence, and peer validation, we make it simple for cooperatives to become the trusted source of next-generation farming solutions.

## Why Ag Organizations Choose Vitto Agtech

### See Clear Financial Upside

- AI-Driven ROI Estimates
- Stay Competitive: Identify emerging trends early and empower members with cutting-edge solutions.

### Build Trust Through Real-World Validation

- Community Feedback: Compare metrics and share experiences in a dedicated forum.
- Peer Reviews: Access unbiased assessments to minimize risk.
- Global Perspective, Local Focus: Tailor solutions from our global database to your region.

### Deliver Immediate Value to Your Members

- Increase Retention: Position your organisation as an innovation hub, driving member loyalty.
- Confident Adoption: Peer-backed recommendations boost investment confidence.

### Leverage the Power of Community

- Manage & Group Innovations: Segment recommendations for targeted rollouts.
- Achieve Economies of Scale: Unlock potential volume discounts and speed up adoption.

## What is our solution?

A digital platform managed by agricultural organizations, designed for farmers.

For agricultural organisations

### 1. Innovation Monitoring

Find on our platform all accessible innovative methods, including new technologies, diversification techniques, biocontrol options, and new crop varieties that may be suitable for your farms.

### 2. Centralized management

Access an administration panel to manage access, view, select, or comment on innovations chosen by members, thereby establishing a comprehensive implementation strategy.

### 3. Access our community

Join our community of innovators and users to share experiences and knowledge. View their feedback, connect directly with your peers, and participate in our webinars.

### Our main objectifs

Profitability

Sustainability

Hardship

Safety

For the farmers, directly available on their mobile phone

### 1. Personalized Recommendations

Receive tailored advice through artificial intelligence analysis of your agricultural data, needs, and opportunities. We cover all types of requirements, whether in crop production or livestock farming.

### 2. ROI Plan

A customized decision-support tool (DST) and analysis, including an evaluation of carbon footprint, subsidies, relevant loans or certifications, as well as an estimate of financial return on investment, a growth strategy

### 3. Access to Our Community

Join our community of innovators and users to share experiences and knowledge. Read their opinions or contact your peers directly—nothing is more reliable than word of mouth.

### 4. Personalized News Updates

Stay up to date with personalized weekly news tailored to your activity's needs. We provide the only essential monitoring you need to follow.

## Ready to Shape the Future of Agriculture?

Sign a Letter of Intent to join our pilot program and provide your members with a streamlined path to smarter, more profitable farming. Together, let's unlock the power of innovation in agriculture.
